PROFILE

Motivated and certified Cybersecurity Engineering student at TEK-UP University, specializing in Network and Information Security. Strong interest in offensive security, penetration testing, and secure system administration. Currently seeking a cybersecurity internship to apply practical technical skills in real-world environments, support organizational security initiatives, and further develop expertise alongside industry professionals.

EDUCATION

TEK-UP University	Tunisia Present
• <i>Engineering Degree – Network & Information Security</i> FSGF	Gafsa 2024
• <i>Bachelor’s Degree in Computer Science</i>	2021

TECHNICAL SKILLS

- **Security Domains:** Network Penetration Testing, Web Application Security, Vulnerability Assessment, Information Gathering , Exploitation Techniques, Advanced injection, API security, WAF and filter evasion
- **Programming:** Python , Bash , PowerShell , C , JavaScript , PHP, SQL , NoSQL , Go , java
- **Infrastructure:** VMware , Windows Server, Kali Linux , Active Directory

PROJECTS

- **NetScanner** :Python-based network scanning tool with a Tkinter graphical interface that discovers active machines on a network and identifies their open ports.
- **ReconForge** is a Python-based web vulnerability scanner that fingerprints a target’s technologies and identifies known CVEs. I integrated an AI agent that autonomously decides which attacks to run based on the findings and executes the full testing workflow with minimal human input.
- **CAPE Sandbox:** Set up and configured a malware analysis environment for automated static and dynamic analysis of suspicious files
- **Wireless Penetration Testing:** Developed an AI-based network monitoring system capable of analyzing real-world network traffic to detect anomalies and suspicious activity in real time.

CERTIFICATIONS

• eJPTv2 – Junior Penetration Tester – INE	Oct 2025
• eWPTv2 – Web App Penetration Tester – INE	Feb 2026
• ICCA – INE Certified Cloud Associate – INE	May 2026
• eWPTXv3 – Web Application Penetration Tester eXtreme – INE	July 2026
• CEH – (in progress)	
• CRTP – (in progress)	

HACKTHEBOX PRO LABS

• Mini Pro Lab Mythical	Jun 2026
--------------------------------	----------

LANGUAGES

- **Arabic:** Native proficiency
- **English:** Intermediate
- **French:** Intermediate
- **German:** Beginner(A2)

TOOLS

- **Pentest:** Metasploit Framework / Burp Suite / Nmap / Wire-shark / SQLMap/Gobuster/Nikto/zaproxy/ theHarvester/ Amass/ Shodan
- **Sysadmin:** Ansible
- **Infra:** VMware/VirtualBox/GNS3/Visual Studio/VS Code

PROFESSIONAL INTERESTS

- Offensive Security Research / Security Automation
- Malware Analysis & Reverse Engineering
